Blueprints for the Week

October 6, 2017

Editor – Deputy Chief Jim Jensen

Volume 2, Issue 5

Photo of the Week

This is one of the interior vaults in the evidence room. Exterior brick work will begin next week.

Video Clip of the Week

This week's video is another time-lapse, containing 12 hours of footage, condensed into a 2 minute clip. Click on the link below to view:

Training Wing Flooring

Work in this area seemed to go slower than the other areas of the building. However, once you see all of the underground details (plumbing & electrical) it is much easier to understand why it took a little longer. Kudos to the construction guys!

Roofing

Roof work is ongoing with crews from AREA Erectors. The steel roof decking has been installed and detailed on the East side of the building above the jail and evidence processing.

Crews have started to install the decking above the Sergeant, Traffic Unit and Records areas of the building. In this picture, you are looking directly into Investigations, which is very cool!

Next Week

Exterior brick work is underway! Crews are laying brick along the Northeast end of the building and will continue south around to the front of the building. The look of the building is totally going to change!

Interior wall work will be ongoing with the construction of detention room walls and the installation of detention door frames.

Steel crews will receive their third load of steel and begin sorting, labeling and erecting area three (locker rooms).
