# Blueprints for the Week

October 20, 2017

Editor – Deputy Chief Jim Jensen

Volume 2, Issue 7

### Photo of the Week

Work began Friday on the Community Room. Crews were able to hang the support columns for the walls and the ceiling steel. The walls surrounding this room will be glass, making this room almost completely transparent.

### Video Clip of the Week

This week's video is another time-lapse, containing 12 hours of footage, condensed into a 2 minute clip. The mornings are very dark now! Follow this link to view:

### The Week in Pictures ...

This was a busy week for constructions crews! They continued to work on the interior masonry walls, steel, underground plumbing and exterior brick work. Hopefully the weather cooperates over the next several weeks so we are able to get this building enclosed before the cold weather hits and snow falls. Here are some pictures from this week ...

Top Right – North Side Locker Rooms  
Middle Left – Water Main  
Middle Right – Community Room  
Bottom – Training Wing View

### Next Week

AREA Erectors will continue to install steel on the second floor as well as the Community Wing and Training Wing. The steel supports and "I" beams should be completed by the end of next week, weather permitting. There will still be several weeks of decking and detailing work.

Also, concrete for the second floor will be poured next week, if the weather allows. This area will house Investigations, Administration and Social Services.
