### Floor Slab

Crews from Concrete by Wagner poured the lobby and second floor this week. The second floor will house Investigations, Social Services and Administration. Over 250 cubic yards of concrete was poured, which is a crazy amount of concrete!

Administration Area

Concrete piped up through tubing

Finishing touches

### Interior Floors & Walls

A.L.L. Masonry Crews have started the construction of the jail cells in the Holding Facility. This is very intricate work as plumbing and electrical have to be imbedded inside the walls. Check out the pictures of these cells! No need for television mounts or video game panels in this space! ☺

### Radiant Floor Heating

The front lobby was also poured this week after the installation of the floor radiant heating system. Crews from Acitelli installed the Styrofoam floor base that acts as the wiring conduit for the radiant floor system.
