## Blueprints for the Week

November 10, 2017

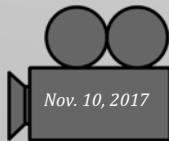

Editor – Deputy Chief Jim Jensen

Volume 2, Issue 10

### Photo of the Week

The decking over the training wing, specifically the range, has been installed with the final detailing to be completed next week. The ceiling above the range will be 8" of concrete which will be poured early next week.

### Video Clip of the Week

This week's video is another time-lapse, containing 12 hours of footage, condensed into a 2 minute clip. A lot of action on the 2<sup>nd</sup> Floor! The garage doors in the Evidence area are also being enclosed in this video.

### Interior Plumbing and Duct Work

Crews have been working on the interior duct and piping work inside the building. While this is not the largest building ever built, it is quite complex due to the standards required in a critical infrastructure building. Below are a few photos showing the interior duct work being installed.

Interior Walls

### Steel

Crews from AREA Erectors continue to erect steel I-Beams and install decking over the training wing and Northern portions of the building. As you drive by the site, you won't notice a big difference; however, things are changing very quickly every single day!
