Photo of the Week

Lobby Area Stone Wall

The stone in the stairway adjacent to the main lobby has been prepped, installed and cleaned. The installation of these large pieces of stone are time intensive, but well worth the effort as the exterior façade continues into the interior front lobby of the building.

Video Clip of the Week

This 2 minute time-lapse video will show a lot of activity on the roof with crews tucking and securing the white tarp along the top of the building. You will also see some metal panels being installed on the side of the building to prepare for the insulation.

Exterior Brick

Brick Cleaning in Process

Crews from A.L.L. Masonry started the final cleaning of the exterior brick along the East side of the building. The white film on the brick is being scrubbed off using scrub brushes, "elbow grease" and some concentrated acidic cleaner.

It smells like rotten eggs, but the brick looks amazing!

Cleaned Brick!

Employee Entrance

The glass on the North end of the building along the Employee Entrance has been installed. Check out this look! Once we start seeing consistent temperatures above 50 degrees, they will finish the detailing and install the mullion caps along each window.

Employee Entrance

North Side of Building

Next Week

Metal panel installation should start next week. Crews from Bennett and Brosseau have been preparing the extension angle bracing with insulation to follow. Provided we have some nice weather, the insulation will be installed next week, followed by the individual metal panels. This work will start along the Northeast side of the building (by the Jail) and will continue south and west along the front of the building.
