

Blueprints for the Week

May 18, 2018

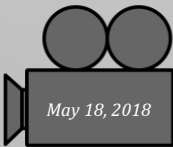

Editor – Deputy Chief Jim Jensen

Volume 3, Issue 14

Photos of the Week

The air conditioner was put in place this week. The unit is 12,000 pounds and installed on a 24" thick concrete pad!

Video Clip of the Week

The time lapse video for this week will show you a lot of work being done on the exterior along with a live feed of the crane installing the air conditioner inside the tower!

Exterior

Acitelli Heating and Cooling installed the building chiller (air conditioner) and the tower mechanical unit this week. The crane operator battled the weight and size of the mechanical unit and a stiff wind to drop the unit down inside the tower. We watched the unit sway from side to side in the wind, but it never struck the tower! Whew!

Unit is Set!

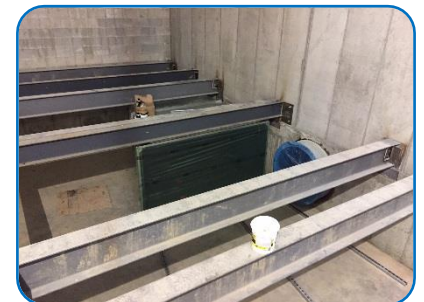

Just Inside the Tower

Interior

Crews started installing the mechanical range duct work this week. This enormous size duct work will connect to the three 36" in diameter underground pipes and will pump clean air into the range.
