Bulldozers working together to clear the land.

Our Future Neighbors

Yes, our building will be bigger and taller!

Earth Work has Begun

Contractors from S & K Excavating were out in force moving massive amounts of earth. The first 18" of black dirt were scrapped off the top and piled high along the back of the site.

Dozers then scrapped away several more inches of clay, carving out the enormous building pad that our building will eventually sit on. The earth work and stabilization portion of this job will continue for several more weeks as long as the rain holds off.

Rain, Rain Go Away!

Another inch and a half of rain has slowed our project down.

No one is out slopping around in this mud!
