## Blueprints for the Week

May 19, 2017

Editor – Deputy Chief Jim Jensen

Volume 1, Issue 5

### Photo of the Week

Three layers of lime were tilled into the ground bringing our pad up 2-3 feet

### *In Summary ...*

*We have had some great days to work! Sunny, hot and windy ... just what the soil needed.*

*Mt. Carmel completed the lime stabilization of the building pad this week. S & K Excavating will be working hard all of next week adding layers of clay fill from the borrow pits to the building pad, bringing the overall pad up 5-6 feet.*

*Rubino, our contracted civil engineer has been on site all week testing the dirt compaction level and is very happy with the results.*

From dirt field Lime-hardened dirt field!

### *Vision*

*Look to the future ... have a vision.*

*After living this project for many months, it is becoming easier to picture the building and the different "views" as you look at the property.*

*This will be the garage that leads you into the holding facility*

*The front of the Community Room along Woolley Road.*
